Skylights

# Remote setup guide

for your Energy Performance  
model skylight

**WINTER**

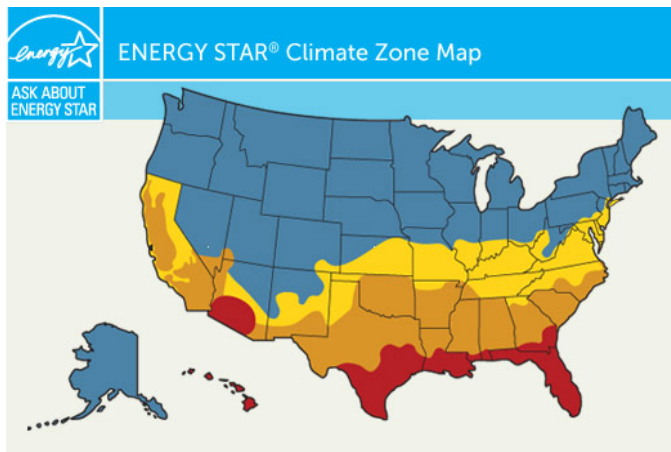

Blinds automatically close at night during winter months to maximize energy efficiency and reduce heating costs.

**SUMMER**

Blinds automatically close during the daytime in warm summer months to maximize energy efficiency and reduce cooling costs.

Climate zone	Summer Mode <i>suggested start date</i>	Winter Mode <i>suggested start date</i>
Northern <i>mostly heating</i>	June 1	October 1
North Central <i>heating and cooling</i>	May 1	November 1
South Central <i>cooling and heating</i>	April 1	December 1
Southern <i>mostly cooling</i>	Year-round	N/A

*Suggested operation times:*

Blind in down position	10:00AM	6:00PM
Blind in up position	6:00PM	10:00AM

## Introduction

The following instructions illustrate how to program the KLR 200 for optimal energy performance of VELUX skylights.

Before programming your KLR 200 remote control, organize products and remote controls. Each blind has been pre-registered to the KLR 200 included with the skylight and pre-installed blind.

If multiple blinds are being installed and you want them controlled by one remote, then you will need to reset the products and add them to one remote control. Refer to the KLR 200 "Quick start guide" for resetting products. Once products have been reset, refer to the "Quick start guide" for "Adding products to the control pad." Follow these instructions to add the desired products to the KLR 200 Remote control.

With the KLR 200/s organized, you are ready to start programming. Each remote that has different products registered to it will have to be programmed separately.

## Programming the KLR 200 remote control

In most cases you will need to enter two programs: *Summer* and *Winter*. The Southern climate zone will only need to have a Summer program. Refer to the climate zone map on the previous page for your climate zone.

Once the programs have been entered, refer to the climate zone map for suggested dates for starting and stopping the *Summer* and *Winter* programs.

*You will need to start and stop the seasonal programs on the KLR 200 remote control. Only one program should be active.*

Visit [veluxusa.com/taxcredits](http://veluxusa.com/taxcredits) for additional information on 30 percent federal tax credit, and detailed step-by-step instructional video on programming Summer and Winter modes.

Skylights
