General Notes

1. The design employs the VELUX TCT system (VELUX Tech. No. TCT). VELUX TCT is a retractable skylight designed for a commercial SUN TUNNEL application. For a U.S. commercial skylight application, a U.S.-based version of the product is available.

2. The design incorporates a combination of products that are not currently available on the market. The design is intended to be a conceptual model for a product that may be developed in the future. The design is not intended to be a prototype or a commercial product.

3. The design incorporates a combination of products that are not currently available on the market. The design is intended to be a conceptual model for a product that may be developed in the future. The design is not intended to be a prototype or a commercial product.

4. The design incorporates a combination of products that are not currently available on the market. The design is intended to be a conceptual model for a product that may be developed in the future. The design is not intended to be a prototype or a commercial product.

5. The design incorporates a combination of products that are not currently available on the market. The design is intended to be a conceptual model for a product that may be developed in the future. The design is not intended to be a prototype or a commercial product.

6. The design incorporates a combination of products that are not currently available on the market. The design is intended to be a conceptual model for a product that may be developed in the future. The design is not intended to be a prototype or a commercial product.
